

LONG-FORM JOURNALISTIC STORY

**BRAINSTORMING**

# FINAL STORY SCOPE

Identify an **important scientific topic** deserving of storytelling.

**Locate, interpret, and understand** peer-reviewed scientific information about the topic.

Select appropriate **storytelling techniques** and writing **strategies** for communicating about the topic.

Generate a **long-form written story** about the topic.

# STORY PROPOSAL

**Describe** the scientific issue

**Identify the rationale** for selecting this topic by summarizing the importance of it for your readership. In other words, what is the significance of the topic for society? “So What?”

Explain the **primary feature story format** (explanatory, profile, issues/trends) you intend to use to communicate the story and **why**.

# SOURCES . 1

At least **2 scientific published** sources.

These will likely be from **peer-reviewed** scientific journals, but may also be from non-biased white papers or reports or books or book chapters.

# SOURCES . 2

Provide a list of **at least 2 individuals** you plan to interview for the story.

One of these should be an **author of one of the studies** you are using as a source.

One should be a researcher **conducting science in a related area**, but does **not** have to be an author of the *primary published sources* you are using in your reporting.

This is an independent researcher who can provide a **valuable "check"** on understanding the significance of the scientific research you are using.

# GETTING STARTED

# SEARCH

1. **Find** a science article and **review it**
2. **Address** these points
3. **Share** your thoughts with a partner

- *science news*
- *the Atlantic*
- *Scientific American*
- *BBC science & environment*
- *NPR science*
- *High Country News*
- *popsci*
- *sciencemag*

- What does it do **well?** **Poorly?**
- Can you identify the **target audience?**
- Does it have a **strong lead?**
- What is the **tone**, and general **format?**
- How does it incorporate **interviews**, is this **effective?**
- Did you **engage** with the article? Why or why not?

# AUDIENCE

..... **Who** are they, and what do they **know already**? .....

..... Why should they **care** about this? Barriers? .....

..... What can they **learn**; return on investment? .....

..... Often, “For **Everyone**” really means “For **No One**.” .....

..... Find a **Singular takeaway** for the target audience. ....

..... How much background information do you need to provide? .....

# FORM

..... Depending on the topic, certain **forms and formats** may work better than others. ....

..... What's the **weight** of the issue, what direction are you taking the story? ....

..... What **tone** works well for this topic and could engage the reader? ....

..... **Stylistic** devices, e.g. hyperbole, irony, climax, personification ....

..... How complex is the **language** and **jargon**, what's appropriate? ....

# INTERVIEW

Who are you interviewing, why are their words **valuable**?

What are they **contributing** to this topic, at varying levels?

How are you **presenting** them and their words?

Portray them accurately, **humanize** the interview

How will you establishing their **credibility**?

Transcribe with tools like **Otter.ai**

# LEADS

*How will you draw your reader in?*

**What style of lead is appropriate for this topic, is it effective?**

- Summary (5Ws)
- Delayed ID Lead (who is who?)
- Creative
- Analogy

**Remember**

- Answer 5Ws and H
- Less is more
- Use it as a hook
- Accurate, Brief, Clear

***Experiment with different styles and see what works***
